Hi Richard - i appreciate the links you shared concerning hydraulic fracturing and EPA activities. I reviewed and printed all three. Thank you. I have attached a letter (that i may submit to some online guest commentary) that expresses my continued concerns and frustrations. I can only hope that the EPA will openly stand up and recomend that the 2005 exemption for the Oil & Gas Industry from the Clean Water Act be reversed. Thank you again for your consideration and your time. Kathleen
